

RAYBLAZE

# Digitally Enable Faster, Error-Free Diagnostic Operations

A Unified Platform for Diagnostics, Finance, and  
Patient Engagement

[www.rayblaze.com](http://www.rayblaze.com)

Diagnostic centres and healthcare providers today must deliver accurate results quickly while managing growing operational complexity. Manual processes, disconnected systems, and limited visibility slow down workflows and impact service quality.

A centralized digital management platform simplifies daily operations by automating workflows, reducing manual effort, and providing real-time visibility across diagnostics, administration, finance, and patient engagement. Designed for single centres, multi-location networks, and franchise-based models, the platform enables organizations to operate efficiently today and scale confidently for the future.

## Key Business Outcomes

- ✓ Reduced report turnaround time
- ✓ Fewer manual errors and process delays
- ✓ Centralized control across locations
- ✓ Improved patient experience and trust
- ✓ Real-time operational and financial insights

# Core Capabilities

## End-to-End Diagnostic Automation

Manage the complete diagnostic workflow—from patient registration to report delivery—within a single, integrated system.

- ✓ Automated test workflows and validations
- ✓ Minimal manual data entry
- ✓ Standardized operations across centres
- ✓ Faster sample processing and reporting

## Multi-Centre and Franchise Management

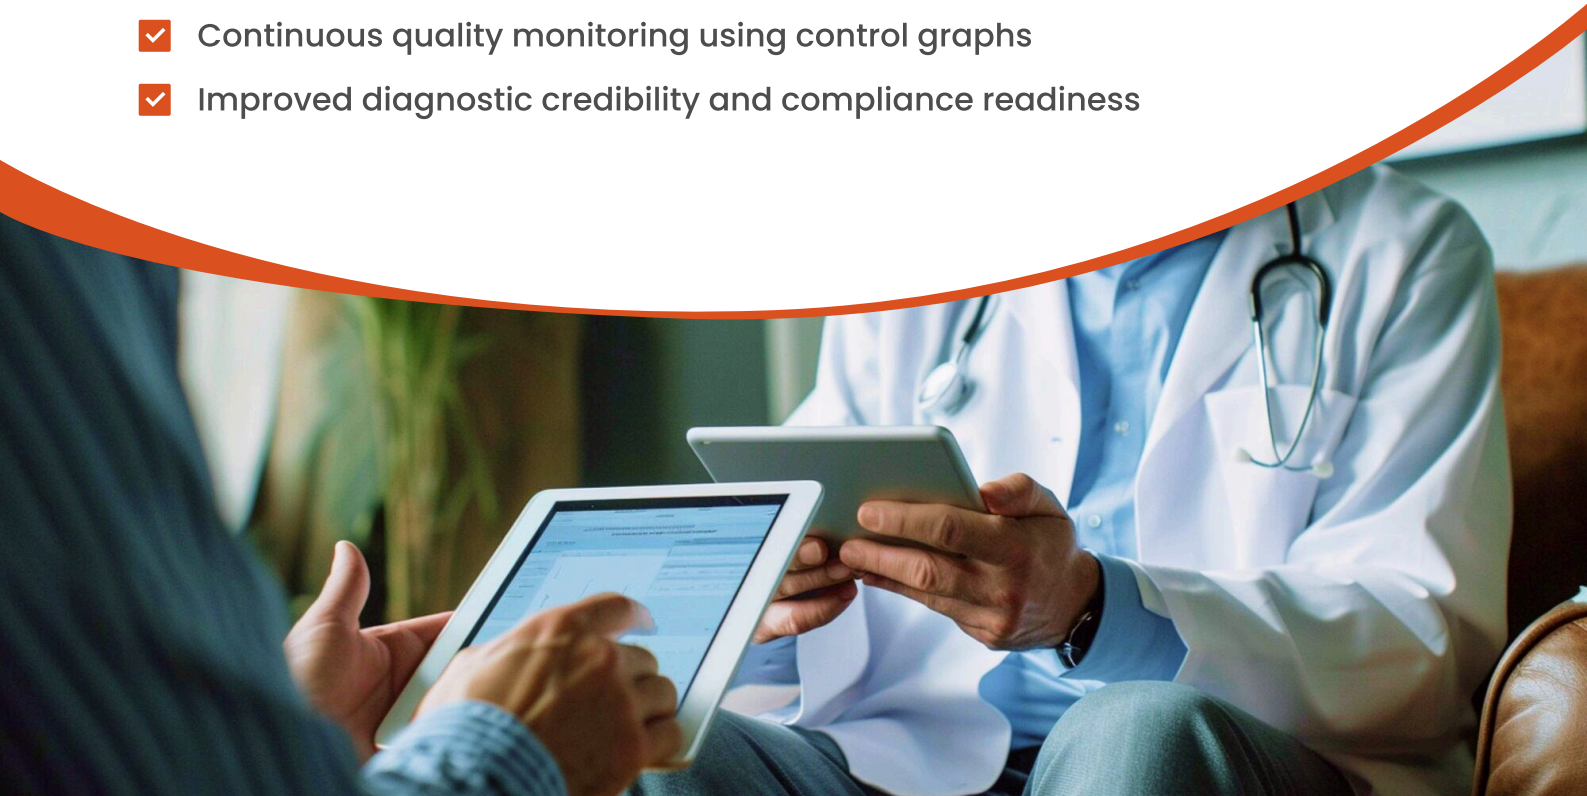

Operate multiple centres with centralized oversight and consistent processes.

- ✓ Unified dashboard for all locations
- ✓ Centralized financial and performance tracking
- ✓ Simplified daily closures without cross-centre coordination
- ✓ Seamless collaboration with franchise and partner centres

## Machine Interfacing and Quality Monitoring

Ensure accuracy, consistency, and confidence in diagnostic results.

- ✓ Direct machine-to-system result capture
- ✓ Reduced risk of manual transcription errors
- ✓ Continuous quality monitoring using control graphs
- ✓ Improved diagnostic credibility and compliance readiness

# Financial Control & Patient Experience

## Smart Billing and Financial Management

Maintain complete control over revenues, pricing, and collections.

- ✓ End-to-end billing and payment management
- ✓ Differential pricing for corporates, referrals, and patient categories
- ✓ Partial payments, refunds, and outstanding tracking
- ✓ Faster daily, monthly, and annual account closures

## MIS Reports and Business Insights

Enable informed decision-making with real-time analytics.

- ✓ Revenue and collection summaries
- ✓ Centre-wise performance and test volumes
- ✓ Turnaround time and efficiency analysis
- ✓ Inventory usage and cost trends

## Digital Reports and Faster TAT

Improve patient convenience while reducing waiting time.

- ✓ Reports delivered via SMS, email, and messaging platforms
- ✓ Secure, easy-to-access digital reports
- ✓ Reduced patient follow-ups and counters congestion
- ✓ Higher patient satisfaction and retention

## Electronic Medical Records (EMR)

Securely store and access patient data on the cloud.

- ✓ Long-term patient record preservation
- ✓ Easy access to historical reports
- ✓ Health trend analysis through charts and graphs
- ✓ Better clinical decision-making

# Growth, Security and Contact

## Patient and Partner Engagement

Strengthen relationships with patients, referral doctors, and corporate partners.

- ✓ Transparent sample tracking and reporting
- ✓ Clear billing and settlement visibility
- ✓ Health reminders and promotional campaigns
- ✓ Privilege programs to encourage repeat visits

## Inventory and Stock Management

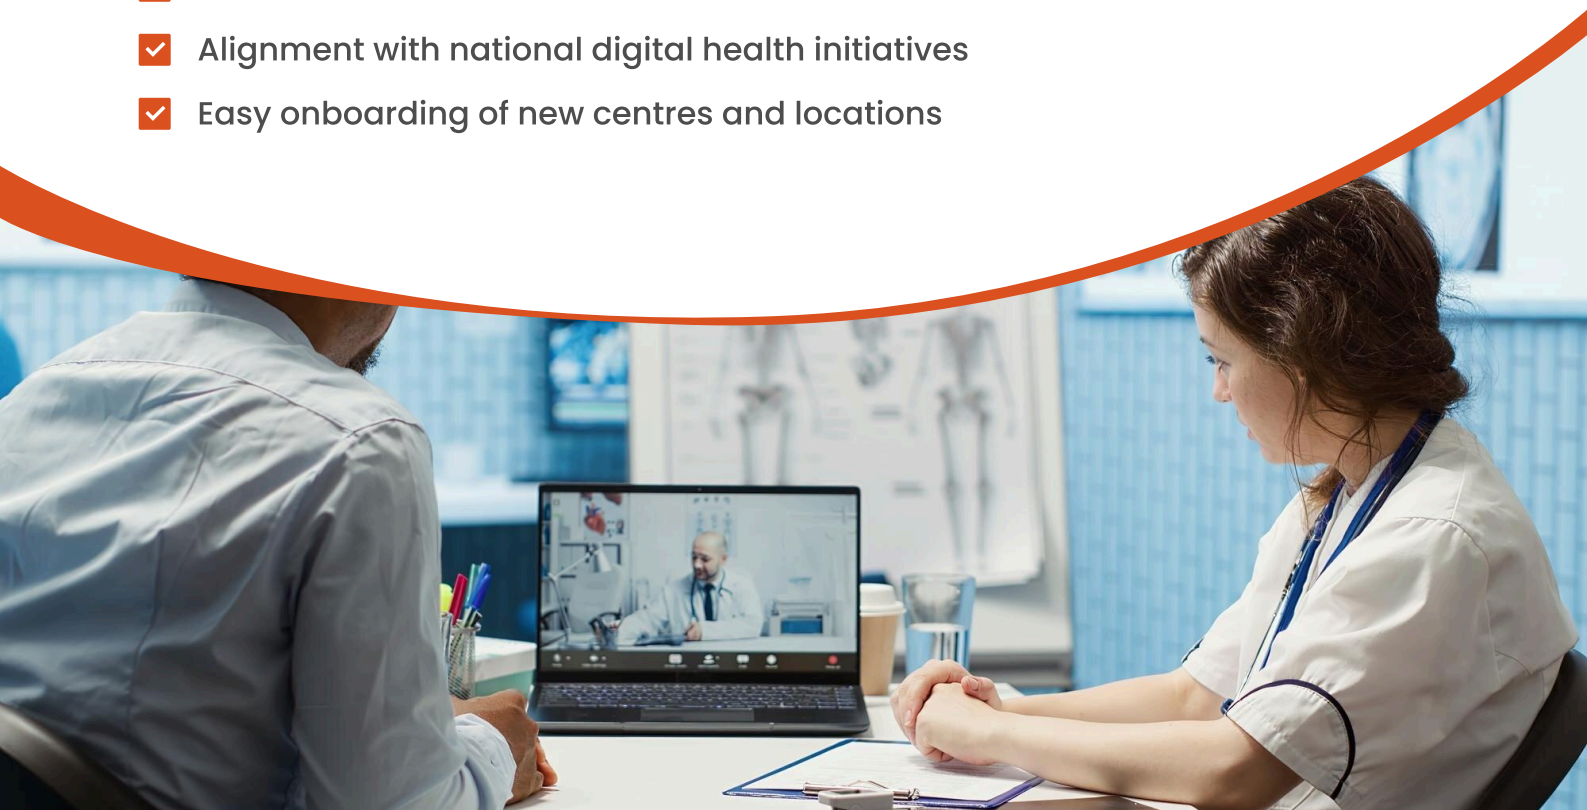

Prevent revenue loss and operational disruption through accurate inventory control.

- ✓ Real-time stock visibility
- ✓ Automated reorder alerts
- ✓ Stock transfers across centres
- ✓ Data-driven procurement decisions

## Security, Compliance, and Scalability

Operate securely while scaling without disruption.

- ✓ Role-based access control and audit logs
- ✓ Secure cloud-based infrastructure
- ✓ Alignment with national digital health initiatives
- ✓ Easy onboarding of new centres and locations

# About Rayblaze Global Pvt Ltd

Rayblaze is a technology-driven digital solutions company delivering scalable platforms for healthcare, diagnostics, education, logistics, and operations management. The company focuses on building secure, integrated systems that improve operational visibility, data accuracy, and decision-making—helping organizations digitize critical workflows and support long-term growth.
