

# Smart and Connected Oilfield Operations

## Intelligent Control for Modern Oilfield Operations

Unify every branch, every process, and  
every transaction – so your business runs  
with clarity, speed, and control.

Simplify complex business processes for multi-branch and multi-region operations, including fuel distribution, fleet dispatch, invoicing, and compliance, to enhance accuracy, traceability, and decision-making for customers.

## Unified Control of Oilfield Operations

- Replace silos with real-time digital workflows
- Harness IoT and analytics for data-driven control
- Digitize compliance and enable scalable operations

# One System. One Source of Truth.

Unify business hierarchy - companies, branches, and cost centers-on a single digital platform. Remove duplicate data, automate transaction reconciliation, and ensure team alignment.

## Procurement

Smart Orders,  
3-way Match

## Tank & Depot

ATG, Calibration,  
Stock Control

## Fleet

Real-time View,  
ePOD, Trip Optimize

## Inventory

Precise Tracking,  
Calibration

## Sales

Quote-to-cash,  
Integrated Pricing

## Finance

Automated Billing,  
Compliance

## HSE

Permits,  
Audits, Safety

## HR

Rostering, WPS,  
Performance

## Analytics

Dashboards,  
Data Insights

# Operate Smarter. Govern Stronger. Decide Faster.

Empower your teams with real-time market intelligence and secure data. Monitor performance, manage compliance, and forecast outcomes with confidence.

## IOT & Telemetry Integration

GPS tracking, tank levels, meters, and probes for real-time monitoring.

## Predictive Analytics & Dashboards

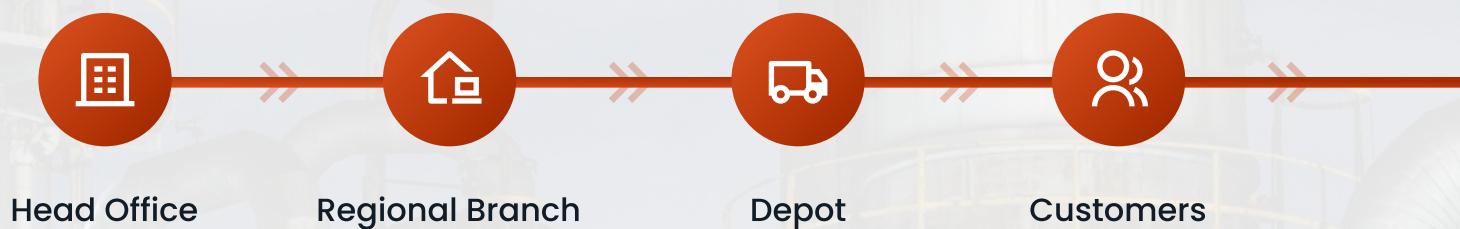

Role-based visualizations with forecasting capabilities.

## Operational Management

HSE compliance, maintenance scheduling, incident tracking, and risk assessment.

# From Contract to Cash; Your Entire Operation in Sync

Streamline trading, supply, transport, and finance into one connected workflow. From capturing deals and scheduling deliveries to issuing invoices, every step updates automatically-reducing errors and improving turnaround.

# Why Choose Us?

Our combined solution is built for the real operational demands of oil trading and distribution. We align industry workflows with reliable engineering to deliver efficient, transparent, and scalable operations.

- **Industry-aligned Workflows**

Designed around actual trading, fleet, depot, finance, and compliance processes.

- **AI-driven Visibility**

Real-time data and predictive insights to support faster decisions and stronger governance.

- **Integrated Digital Operations**

Replace manual, siloed tasks with connected workflows that increase accuracy and accountability.

- **Flexible and Scalable Setup**

Adapts to business structures, pricing, regulations, and geographic spread.

- **Reliable Engineering Support**

Customization, performance tuning, cloud deployment, and ongoing lifecycle support.

- **Smooth Rollout and Adoption**

Structured implementation and training that keeps daily operations running.

# About Us

Rayblaze Global deliver a unified digital operations solution for the oil trading and distribution sector. Together, we combine industry-aligned platform design with strong engineering and delivery capability to modernize operational control, strengthen compliance, and enable scalable growth across multi-branch environments.

## Rayblaze Global

Rayblaze provides the AI-driven operations platform that connects trading, fleet, depot, finance, and compliance processes into a single, governed workflow. The company focuses on advancing digital transformation by improving data integrity, operational transparency, and decision-making accuracy across complex supply and distribution networks.
